

The Pegasus Tutorial at ADASS23, will be a hands-on session, whereby users will login to ACCESS Pegasus (<https://access.pegasus.isi.edu>) to execute Jupyter training notebooks that walk users through creating, submitting and monitoring workflows using the Pegasus Python Workflow API.

ACCESS Pegasus is a hosted instance that allows users to run computational workflows across ACCESS (<https://access-ci.org/>) resources. For purposes of this tutorial, the users **DO NOT NEED** an ACCESS allocation. However, you need to create a user account for yourself, that will allow you to login to ACCESS Pegasus to do the training.

Before coming to the tutorial, it is requested that you do

**A)** If you already have an ACCESS or XSEDE user account, you do not need to create a new account, just use your account and password to login to ACCESS Pegasus (<http://access.pegasus.isi.edu>) .

**OR**

**B)** If you do not have an ACCESS or XSEDE user account, then we request that you create one using the instructions at <https://operations.access-ci.org/identity/new-user> . When creating your account, we highly recommend that

- You use **Option 1: Register with an existing identity: Using your existing University / Organization account** when registering with ACCESS simplifies the sign-up process and enables you to log in to ACCESS using that existing account. With this option, creating an ACCESS-specific password is optional during registration, and you will also have the option to create an ACCESS-specific password later if needed.
- Using your existing university account to do the registration, will then enable you to login to ACCESS Pegasus (<https://access.pegasus.isi.edu>) using your university credentials.

If your organization/university does not appear in the drop down list, when you attempt to register for ACCESS for the first time, then complete the registration with

**Option 2: Register without an existing identity**

Please let Pegasus tutorial presenters Karan Vahi ([vahi@isi.edu](mailto:vahi@isi.edu)) and Mats Rynge ([rynge@isi.edu](mailto:rynge@isi.edu)) if you run into any issues creating your ACCESS account.
